EMERGENCY LANDING CRAFT

Emergency Medical Craft

The Mako 11m Aluminium Landing craft has been designed for search and rescue operations in Africa.

This vessel is able to transport equipment and emergency (4 x 4) vehicles of up to 3 tonnes and deploy them to collect and rescue critically ill patients in rugged terrain.

Due its shallow draft & high carrying capacity, this vessel can operate in shallow waterways throughout Africa.

The 11m Landing Craft is ideal for special operations in remote areas and where there is no road access.

Specifications:	
Length	11m
Beam	3.94m
Cargo	5.8 tonnes
Propulsion	2x 150-200Hp
Equipment	Bow ramp
