FIRE AND RESCUE

Fire and Rescue Vessel

This 12m-Custom built Aluminium Fire and Rescue boat has the ability to perform at high speed giving it the ability to reach fire and rescue situations in quick time. The vessel has been fitted with life rafts with a capacity of saving in excess of 600 people. All aspects of the internal medical layout design has been tailored around emergency medical treatment of patients and the ease of use for the medical crew. All critical patient information, like ECG & Vital signs data can be transmitted directly to the nearest hospital to allow consultation

between medical support teams. All devices run off 220v supply with 10hrs of battery back up operations.

Specifications:
