EMERGENCY MEDICAL CONTAINER

MEDICAL CONTAINER FOR EMERGENCY MEDICAL SERVICES

This customised container unit is designed to be lifted onto a hook-lift, drop-body truck platform by means of a hydraulic winch system and is transported directly to an emergency site. The specifications of the container units are fully adaptable to suit various customer demands

EXTERIOR

- High Visibility Markings
- Emergency LED Lighting System
- Remotely Controlled from cab
- Non Slip Surfaces
- Rear Mounted Ladder
- Low-noise Generator
- Awning fitted with LED lighting

INTERIOR

- Front section of container unit accommodates a pneumatically-inflatable 10-bed medical tent in an off-loadable trolley
- With the tent deployed, the front section serves as a medical prep area complete with sink, hot water unit and storage for medical equipment.
- Ten wheeled medical equipment pods are stored in the rear of the container unit for installation in the inflated medical tent. Each pod functions as a self-contained emergency medical unit, complete with a folding bed & space for essential equipment

OPTIONAL ITEM

This vehicle is fitted with an on board 220V-800W inverter with visual battery monitoring with audible alarm
