

MOBILE MEDICAL SOLUTIONS

MEDICAL TRAILER

LIGHT TRANSPORTABLE CLINIC

Our medical trailers have been designed to be towed behind a ambulance or an ATV by medical teams to assist in setting up temporary medical clinics in rural locations around Africa.

All trailers are compact in design and built for off-road travel. They are self sufficient with water and power.

Both sides of the trailer sport

large white panels that fold down to create space for beds. These panels are secured with tamper proof seals and are therefore dust and waterproof. All trailers are custom built to the requirements of the end user.

Specifications:

- 6 x Berths
- Kitchen
- Fridge & Storage
- 2 Plate Gas Stove
- Working Area
- Side Fold Double Bed
- 220V Power Outlets
- Awning – Fox Wind
